

Capable of everything important to you and your interior.

Indispensable in interior fittings. Whether you are renovating your roof, fitting a partition wall or hiding your stereo cable behind the wall, the FEIN MULTIMASTER is the perfect tool for all repairs and installation work. It saws precisely into angles and corners, even in tight spaces, and sands with high sanding capacity, saving time and labor.

1. Cutting cable ducts:

The standard E-CUT saw blade is ideal for working plastic components such as cable ducts, air ducts or downspouts.

4. Cut drywall or plasterboard:

With the E-CUT saw blades, trim plasterboard and make cut-outs easily for electrical installations etc. in sheets that have already been installed.

Order number
6 35 02 133 01 7

5. Sawing pipes flush to the wall:

Ideal for dismantling installations that are no longer required. Using the universal E-CUT saw blades the pipes are clipped off for subsequent grouting flush to the wall.

Order number

7. Sawing shadow joints:

The HSS saw blade for wood turns the FEIN MULTIMASTER into an oscillating „mini“ circular saw ideal for long, exact cuts like expansion sealants in parquet and laminate. Can be used with or without depth stop.

Order number
6 35 02 154 01 0

6. Sanding down plaster:

Use the carbide rasp to sand down cement, concrete, stone, plaster, tile adhesive, paint and wood and save time-consuming and costly manual work.
