

A safe bet for windows, and number one for doors.

Windows, garage doors and outdoor installations can be renovated perfectly with the FEIN MULTIMASTER. Windows are coarse sanded with a 40 or 60 grit sandpaper. After this, smooth the surface with 150 or 180 grit, to achieve excellent results in no time. For best results, use the carbide rasp for heavily weathered surfaces because it provides 5 times more sanding capacity than sandpaper. Even brittle puttied edges can be removed easily and without any danger of glass breakage. The result is completely renovated windows in a surprisingly short time.

1. Sanding frames:

Perfectly sanded surfaces for all conditions of material with the comprehensive range of sanding sheets from 36 to 800 Grit.

For accessories, see page 19 under „Sanding“

2. Sanding spaces and profiles:

The flat sanding pad also gives access to tight spaces, e.g. the slats of shutters.

Clean work with the FEIN TURBO I

Sanding, releases considerable dust that settles as a fine film on surrounding surfaces. Easily contain or clean up this dust with the FEIN TURBO I dust extractor. An integrated on/off switch enables the dust extractor to be controlled easily via the FEIN MULTIMASTER switch. Further information on the FEIN TURBO I set can be found on page 20 and 21.
